DETAILED ACTION

Drawings

1. Replacement drawings for Figures 1A, 1B & 2 were received on January 28, 2009. These drawings are acceptable.

Allowable Subject Matter

2. Claims 1 & 3-33 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

In regard to claims 1, 3-8, 12-17 & 33, the prior art of record alone or in combination fails to teach or suggest: a recordable information storage medium *with respect to which a recording and/or reproducing apparatus, including a drive following a version of a standard that is older than a version of the standard of the information storage medium, records data*, the information storage medium comprising: a lead-in area; a user data area; and a lead-out area, wherein: *compatibility information about whether the information storage medium is compatible with the drive following the version of the standard that is older than the version of the standard of the information storage medium is recorded in at least one of the lead-in and lead-out areas* and is used by the recording and/or reproducing apparatus in the recording of the data to the information storage medium, and when the information storage medium is operable in the drive, the information storage medium stores information about an optimal writing pattern to be used to record the data.

In regard to claims 9-11, see the reasons noted in the previous Office action.

Art Unit: 2627

In regard to claims 18-23, the prior art of record alone or in combination fails to teach or suggest: a recordable information storage medium *with respect to which a recording and/or reproducing apparatus, including a drive following a version of a standard that is older than a version of the standard of the information storage medium, records data*, the information storage medium comprising: a lead-in area; a user data area; and a lead-out area, wherein: *information including strategy information, about which one of a multi-pulse write strategy and a single-pulse write strategy is used to record the data to the information storage medium, is recorded in at least one of the lead-in and lead-out areas, and when detected by the drive, the strategy information allows the drive to record and/or reproduce the data with respect to the information storage medium having the version of the standard that is newer than the version of the standard of the drive.*

In regard to claims 24-32, the prior art of record alone or in combination fails to teach or suggest: a recordable information storage medium *with respect to which a recording and/or reproducing apparatus, including a drive following an older version of a standard than a version of the standard of the information storage medium, records data*, the information storage medium comprising: a lead-in area; a user data area; and a lead-out area, wherein: *information about an optimal writing pattern is recorded in at least one of the lead- in and lead-out areas, and the information about the optimal writing pattern allows the drive to record and/or reproduce data with respect to the information storage medium having the version of the standard that is newer than the version of the standard of the drive.*
